Integrated

Logistics

Sound Familiar?

These are the problems your team faces every single day.

Separate Systems

Manufacturing on one system, logistics on another, accounting on a third. Data never matches.

BOM Chaos

Bill of Materials maintained in Excel. Version control is non-existent. Cost estimates are always wrong.

Production Blind Spots

You don't know actual production status until the shift ends. Wastage discovered too late.

Quality Gaps

No systematic quality tracking. Defects caught at dispatch, not at production. Customer complaints.

→ The LogiIntra Solution

LogiIntra brings manufacturing into your logistics ERP — so production, warehousing, dispatch, and accounting all talk to each other. No more data silos, no more reconciliation nightmares.

What You Can Do

Powerful capabilities that transform how your team works.

1

Multi-Level BOM Engine

Create complex BOMs with sub-assemblies, by-products, and co-products. Version control, cost simulation, and automatic material requirement calculations based on production plans.

- Multi-level BOMs
- Cost simulation
- Version control
- Auto MRP calculation

2

Visual Production Planner

Plan production schedules with drag-and-drop simplicity. Gantt chart views, resource allocation, machine scheduling, and bottleneck identification.

- Gantt chart planner
- Machine scheduling
- Resource allocation
- Bottleneck alerts

3

Live Work Order Tracking

Create, assign, and monitor work orders in real-time. Track actual vs planned quantities, record wastage, manage rework, and capture operator-wise productivity.

- Real-time tracking
- Rework management
- Wastage recording
- Operator productivity

4

Integrated Quality Control

Define quality parameters per product. Inspection at every stage — raw material receipt, in-process, and final. Automated reject/rework workflows with root cause tracking.

- Stage-wise inspection
- Auto reject workflow
- Root cause analysis
- Quality certificates

5

Raw Material Intelligence

Track raw material inventory with reorder level alerts. Auto-generate purchase orders based on production plans. Vendor performance tracking and cost analysis.

- Auto reorder alerts
- PO auto-generation
- Vendor scoring
- Cost analysis

6

Make-to-Ship Integration

Finished goods automatically flow to warehouse management. Dispatch planning, vehicle assignment, and delivery tracking — all within the same system. True make-to-ship visibility.

- Auto warehouse entry
- Dispatch planning
- Delivery tracking
- End-to-end visibility

The Transformation

See what changes when you switch to Logiintra.

X BEFORE

Production data in one system, inventory in another, dispatch in a third. Order-to-ship: 5 days. Wastage: 8%.

✓ AFTER

One unified system. Order-to-ship: 2 days. Wastage: 3%. Real-time production visibility.

Zero

Data Silos

End-to-End Workflow

Built For

- Logistics companies with manufacturing
- Process manufacturing
- Job-work / contract mfg
- SME manufacturers
- Assembly operations
- Make-to-order businesses

Having manufacturing and logistics in one system eliminated the data silos that were costing us 2 days per order cycle.

— Plant Manager, Manufacturing Company, Gujarat

One Platform. Six Segments.

You're looking at Manufacturing Operations — but Logiintra does much more.

 Bulk Cargo Port ops & stevedoring	 Container Freight & customs	 NVOCC Liner operations
 Transportation Fleet management	 Warehousing Inventory & billing	YOU ARE HERE  Manufacturing Production & QC

Plus Shared Modules

- Accounting & Finance**
GST invoicing, TDS/TCS, bank reconciliation, multi-branch P&L
- AI Document Intelligence**
Reads documents, processes emails, creates entries automatically
- HR & Payroll**
Attendance, leave, salary processing, PF/ESI compliance
- Reports & Analytics**
Real-time dashboards, custom reports, MIS, and executive summaries

Cloud-Based 100% GST Compliant AI-Powered Multi-Branch Mobile Ready 99.9% Uptime
