NVOCC Liner Operations

Your Liner Business, Fully Digitized

India's only ERP purpose-built for NVOCC operators and shipping liner companies.

30+

NVOCC Operators

50K+

HBLs/Year

Real-time

Fleet View

Multi-port

Operations

Sound Familiar?

These are the problems your team faces every single day.

HBL Chaos

House BLs managed in Word/Excel. Amendments are untracked. Surrenders get lost between agents.

Container Fleet Blindness

You don't know where your containers are, how long they've been idle, or repair costs per box.

Agent Settlement Delays

Manual reconciliation with co-loaders and agents takes weeks. Disputes are common.

No Voyage Economics

P&L per voyage, per trade lane, per container type — all calculated manually, if at all.

→ The LogiIntra Solution

LogiIntra gives NVOCCs what no generic software can — purpose-built HBL lifecycle management, container fleet tracking, and voyage economics that actually match how liner operations work.

What You Can Do

Powerful capabilities that transform how your team works.

1

House BL Lifecycle Engine

Complete HBL management from draft to final, amendment to surrender, release to delivery. Track every BL's status across agents with full audit trail and automatic numbering.

- Auto HBL numbering
- Surrender management
- Amendment tracking
- Multi-agent visibility

2

Freight Consolidation Hub

Plan consolidations visually — drag cargo into containers, optimize space, manage co-loader cargo, and auto-generate Master BL mapping. Support for LCL and FCL.

- Visual consolidation
- Co-loader management
- Space optimization
- MBL mapping

3

Container Fleet Command

Track every container in your fleet — on-hire, off-hire, in-repair, in-transit, idle, or positioned. Monitor utilization rates, repair costs, and fleet economics in real-time.

- Fleet status dashboard
- Repair cost tracking
- On-hire/off-hire cycle
- Utilization analytics

4

Import & Export NVOCC

Separate workflows for import (manifest, arrival notice, DO, release) and export (booking, allocation, HBL, stuffing). Both integrated with main-line operator coordination.

- Import release workflow
- MLO coordination
- Export booking engine
- Arrival notifications

5

Liner Rate Intelligence

Maintain tariffs by trade lane, commodity, container type, and customer. Automated rate application with surcharge management and contract rate handling.

- Trade lane tariffs
- Contract rates
- Surcharge engine
- Rate history

6

Voyage P&L Analytics

See profitability per voyage, per trade lane, per container type, per customer. Identify your most profitable routes and biggest cost leaks.

- Voyage-level P&L
- Customer analytics
- Trade lane profitability
- Cost leak alerts

The Transformation

See what changes when you switch to Logiindra.

X BEFORE

HBLs in Word files. Container positions unknown. Agent settlements take 3 weeks. No voyage profitability data.

✓ AFTER

HBL lifecycle fully digital. Container fleet tracked in real-time. Settlements in 3 days. Voyage P&L on demand.

Voyage P&L

End-to-End Workflow

Built For

- NVOCC operators
- Freight consolidators
- Liner agents
- Shipping liner companies
- Co-loading partners
- Container leasing companies

No other software understands NVOCC operations like Logiitra. The HBL lifecycle management and container fleet tracking are exactly what we needed.

— Managing Director, NVOCC Operator, Mumbai
